FORSTAL

Ref. 30-21

Save money !
by ordering per
BOX OF 10!

Large and sturdy bowl perfect for cattle or horses.

3/4"* brass valve.
Water supply from the top and/or bottom.

Wide paddle, easy to push.

Synthetic material shock-resistant.

*1/2" (15 X 21) connection on request.

Advantages

Reliable and sturdy:

- Very sturdy synthetic waterer, tried and tested for over 15 years by numerous cattle and horse breeders.
- Simple valve (same as F11), unrivalled for nearly 30 years.

Economic :

Forstal is the best quality/price of the entire product range

Easy mounting:

4 fixing points, can be connected to the water supply from the top and/or bottom.

No more freezing risk

thanks to the new circulating unit **SPEED-FLOW** (p.10) or **PROFLOW II** water heater (p.11) or **geothermal probe A-590** (this page).

Ref. 30-22

Synthetic vertical paddle with locking bracket.

3/4" brass valve.

Ref. 30-27

Tube, 3/4" brass valve.

User-friendly. Adjustable flow rate.

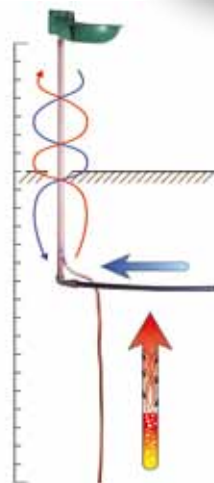

Geothermal Probe

Ref. A-590

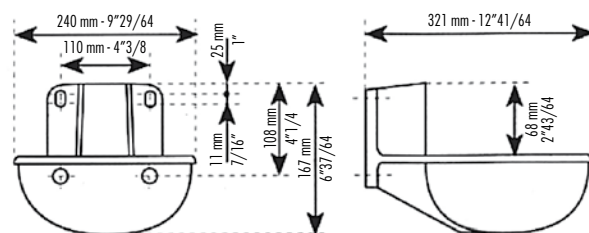

3/4" connection to waterer.

The probe absorbs heat from the soil and transmits it to the valve of the drinking bowl to prevent it from freezing.
Copper.

FORSTAL:
The synthetic bowl is made of sturdy material that has been tried and tested for over 15 years.
