F130: Stainless Steel Bowl Drinker

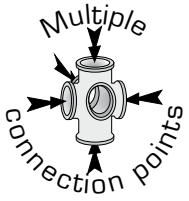
Patent Europe 934696 / US 6101976 / Canada 2261366

LA BUVETTE® The specialist in watering

REF	DESIGNATION	PACKAGING
32-15	**F130** Stainless steel bowl Stainless steel valve with multiple connection points	Plastic bag
A-334	Obligatory Bracket to mount F110 or F130 on Ø 50 to 75 mm tube (see page 58)	

F130
Ref. 32-15

Bowl & Valve Stainless Steel



Synthetic mounting plate: more resistant than cast iron. Can be installed on circular stands (using the A-331 and A-334 mounting brackets) or square and I-shaped stands, as well as corner-mounted with the A-361 set.

Food Safety

- Preserves the bacteriological quality of the drinking water.
- No rust.
- Drain plug.

Farmer Benefits

- Sturdy and reliable.
- Reliable valve, neither leak nor reduced water flow.
- Easy mounting, 9 water connection possibilities 20 x 27 (3/4").
- Quick draining and cleaning.
- Easy and quick valve maintenance without dismantling the bowl.
- Adjustable flow rate up to 20 l./min (5,28 USG)/min) by an external screw with a screwdriver or coin.
- Very deep bowl avoiding water spilling : Water savings - Lower need of loose straw.
- Keep it frost-free with a SPEED-FLOW (p.10)

Animal comfort

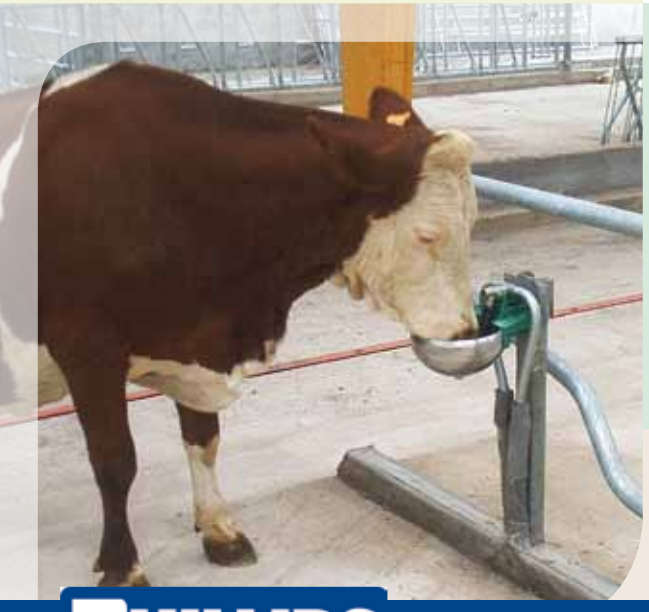
- High flow rate, comfortable for the animals due to the jet breaker.
- Large bowl, easy access for the animals.
- No wet litter.

USER'S OPINION

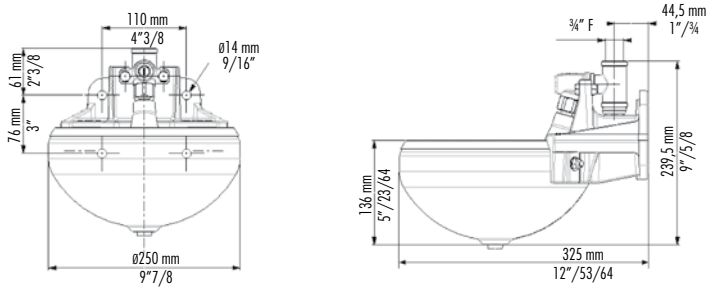
Noël Fréville,
Farmer of Charolais (70 cows)
in Sainte-Croix-sur-Buchy

«A waterer that will last for 2 generations»

"I chose the F130 because I wanted a waterer that could withstand impacts from cows when they are many in one pen. I bought one to first test its resistance. I can say that I was completely satisfied. I even put a group of bulls in that pen and the waterer didn't move one bit."



FOR THE MOUNTING OF **F130**



OUR ADVICE

Ideal for dairy cows if mounted on poles, near to the feed area.
